

AISTW Excavation Schedule

We know everyone is excited to attend an excavation. Remember, though, we can't predict emergencies. Rather than calling or emailing us, please note that when there is going to be a public excavation we will post it here. We are just as excited as you are!

Check schedule for changes or cancellations before you attend.

Nest	Day	Date	Time	Location	Parking/Access	Person Excavating

Sea Turtle nesting on Amelia Island has likely ended, but over 20 incubating nests remain. This year marks the first documented nesting of the critically endangered Kemps Ridley on our beaches, and the first Leatherback nest since 2018. Check back for more public nest excavations.

Weather Note: Check schedule for changes or cancellations before you attend.
